Table 2. Schedule A Commodity by Country of Origin

(For coverage, valuation, and rounding procedures see General Explanation. Shipments valued at less than $251 are shown only under Schedule A commodity 9900000 and excluded from all other commodities. OTH CTY represents total for countries averaging under $1,000 per month (used on general imports).)

Table 2. Schedule A Commodity by Country of Origin

(For coverage, valuation, and sampling procedures, see General Explanation. Shipments valued at less than $251 are shown only under Schedule A commodity 990.0000 and excluded from all other commodities.
OTH CTY represents total for countries averaging under $1,000 per month based on general imports)

Country of origin	General imports				Imports for consumption			
	Current month		Cumulative, January to date		Current month		Cumulative, January to date

Table 2. Schedule A Commodity by Country of Origin

(For coverage, valuation, and terms of transaction, see General Explanation. Shipments valued at less than $251 are shown only under Schedule A (primarily 990 0000) and excluded from all other commodities. OTH CTY represents data for countries exempted under $1,000 per month basis on general imports.)

Table 2. Schedule A Commodity by Country of Origin

(For coverage, valuation, and sampling procedures, see General Explanations. Shipments valued at less than $251 are shown only under Schedule A commodity 9900000 and excluded from all other commodities. OTH CTY represents data for countries exempted under $1,000 per month (or less in general imports).)

Table 2. Schedule A Commodity by Country of Origin

(For coverage, valuation, and sampling procedures, see General Explanation. Shipments valued at less than $251 are shown only under Schedule A commodity 990.0000 and excluded from all other commodities.
OTH CTY represents total for countries averaging under $1,000 per month based on general imports)

Country of origin	General imports				Imports for consumption			
	Current month		Cumulative, January to date		Current month		Cumulative, January to date	
	Net quantity	Value (dollars)	Net quantity	Value (dollars)	Net quantity	Value (dollars)	Net quantity	Value (dollars)

Table 2. Schedule A Commodity by Country of Origin

(For coverage, valuation, and sampling procedures, see General Explanation. Quantity valued at less than $.51 are shown only under Schedule A commodity 990 0000 and excluded from all other commodities. OTH CTY suppressed when the quantities exceeding certain $1 000 per month (based on general imports).)

Table 2. Schedule A Commodity by Country of Origin

For coverage, definitions, and explanation of General Imports, Imports for consumption, and special symbols, see headnote, page 2—1. Imports of less than $251 per bill are not shown separately under Schedule A commodity no. 990.00 and are included in the appropriate country total.
OTH CTY represents total for countries shipping under $1,000 per month to the United States.

Foreign Commerce and Navigation of the United States: 1965 Volumes I-II-III

These three Handsomely-bound volumes contain over 2,000 pages...40 tables... charts offering a complete history of United States import and export activities and official statistical data on the Foreign Commerce of the United States through 1965. **Data are compiled by years...some by month...continent ...customs districts...tariff schedules...** calculated duties and commerce with outlying areas of the United States.

Also - indexes in each volume to commodity classifications and other explanatory materials are included in the three volumes.

Export and Import statistics reflect both government and nongovernment exports and imports of merchandise between the United States Customs area (including the 50 States, the District of Columbia, and Puerto Rico) and foreign countries. In general - the statistics are a record of the physical movement of merchandise between the United States and foreign countries.

Volume I - **Standard International Trade Classification** (SITC) **Commodity by Country** 628pp **$7.00**

Volume II - **Area and Country by Standard International Trade Classifications** (SITC) 844pp **$8.25**

Volume III - **Schedule A and Schedule B Commodity by Country** 960pp **$9.00**

Please send me copies indicated C3.159:965/V.1-3

SPECIAL ANNOUNCEMENTS

1970 Edition of "U.S. Foreign Trade Statistics Classifications and Cross-Classifications" Scheduled for Publication in April 1971

The 1970 issue of *U.S. Foreign Trade Statistics Classifications and Cross-Classifications* is scheduled for release in April 1971. This publication, originally issued in 1968, brings together all the schedules of commodity and geographic trade classifications and cross classifications used in compiling and publishing U.S. foreign trade statistics. The 1970 edition updates the information contained in the 1968 edition. This publication can be used by those interested in foreign trade statistics as an aid in "communicating across" or interrelating the different commodity classification systems used in compiling data on U.S. exports, imports, and domestic production as well as related data of our trading partners.

When available, copies of *U.S. Foreign Trade Statistics Classifications and Cross-Classifications, 1970* may be purchased from the Superintendent of Documents, Washington, D.C. 20402 for $6.00 per copy ($1.50 additional for foreign mailing). Subscribers to this edition will receive any revisions in the form of write-in changes and/or reprint pages.

Information on Rejections of Certain Meat Imports Subject to Quota

Information from the U.S. Department of Agriculture on rejections of imported fresh, chilled, or frozen beef, veal, and mutton, by country of origin for the year January - December 1970 is as follows:

Country of origin	Beef (pounds)	Veal (pounds)	Mutton (pounds)
Canada	626,104	101,370	135,060
Mexico	116,160	-	-
Honduras	45,000	-	-
Nicaragua	119,457	-	-
Costa Rica	232,650	-	-
Northern Ireland	283,286	-	-
Ireland	1,422,817	-	-
Australia	8,143,150	-	2,247,375
New Zealand	3,528,873	354,982	-

This information is being published because of special interest in regard to meat subject to the import quota under Public Law 88-482, T.D. 56253. The above stated rejections are included in the published statistics in this report under Schedule A numbers 011.1010-011.1030, and 011.2020 and 011.2060 (TSUSA numbers 106.1020 - 106.2040).

GENERAL EXPLANATION

COVERAGE

The import statistics reflect both government and nongovernment imports of merchandise from foreign countries into the U.S. customs area (includes the 50 States, the District of Columbia, and Puerto Rico), whether or not the importation involves a commercial transaction. In general, the statistics record the physical movement of merchandise into the United States from foreign countries, with the exception of the following types of transactions which are excluded from the statistics:

1. Merchandise shipped in transit through the United States, when documented with customs as an in-transit movement. (Foreign merchandise moving in transit through the United States which is released from customs' custody is documented as an importation and included in the import statistics. Its exportation from the United States is reported in the export statistics.)

2. Shipments between the United States and Puerto Rico, between the United States and its possessions (including the Virgin Islands), between any of these outlying areas, and imports into U.S. possessions from foreign countries. (Imports into Puerto Rico from foreign countries are included in the U.S. import statistics.)

3. U.S. merchandise returned by U.S. military forces for their own use.

4. Gold in the form of ores, concentrates, waste and scrap, and refined bullion. (Silver in these forms, which was also excluded prior to January 1969, is now being included in the statistics in this report.) Issued monetary coins of all component metals continue to be excluded.

5. Some other transactions not considered imports for statistical purposes or of relatively small significance in terms of total value or statistical importance, such as personal and household effects of travelers, temporary imports, low-valued nondutiable imports by mail, etc.

TYPES OF IMPORTS

Imported merchandise is reported as "general imports" and "imports for consumption." General imports are a combination of entries for immediate consumption and entries into customs bonded warehouses. With certain exceptions as indicated above, these data reflect total arrivals of merchandise, whether such merchandise enters consumption channels immediately or is entered into warehouses under customs' custody to be subsequently withdrawn for consumption or withdrawn for exportation. The general import statistics, therefore, reflect merchandise entered for immediate consumption ("duty free" merchandise, merchandise on which duty is paid on arrival, and merchandise entered into customs bonded manufacturing warehouses for processing and subsequent export of the main product) plus merchandise entered into customs bonded storage warehouses and customs bonded smelting and refining warehouses.

Imports for consumption are a combination of entries for immediate consumption and withdrawals from warehouses for consumption. With certain exceptions as indicated above, these data reflect the total of commodities entered into U.S. consumption channels. Imports for consumption statistics include merchandise entered for immediate consumption (as parenthetically explained above) plus merchandise withdrawn from customs bonded storage warehouses for consumption, merchandise withdrawn from customs bonded smelting and refining warehouses, and merchandise transferred from customs bonded storage warehouses to customs bonded manufacturing warehouses for manufacturing and export.

MONTHLY CARRYOVER

It is the objective of the compiling procedures to include shipments, insofar as practicable, in the import statistics for the month of import, which is based on the filing date of the import entry (immediate consumption or warehouse entry) or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carryover of a small percentage of items from the actual month of importation to a subsequent month, usually the succeeding month.

Except for the month when a change in the carryover is introduced, carryover should have little effect on month-to-month comparisons of overall import totals, since the carryover of the previous month should compensate roughly for that of the following month. For smaller segments--commodity, country, and commodity by country totals--there is also some compensation on a month-to-month basis, but comparisons should be made with the awareness that figures for a given month may represent more or less than the amounts shipped during the month, especially where the volume of trade is not large. For cumulative data, the problem of monthly carryover is somewhat minimized.

SOURCE OF INFORMATION

The source of information on imports of merchandise is the import entry and warehouse withdrawal forms which importers are required to file with customs officials. Statistical factors of country of origin, net quantity, value, and commodity classification are verified by customs officials on formal consumption and warehouse

[1]For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward customs manifest for the vessel).

entries filed for transactions valued over $250, which are ordinarily subject to examination for customs appraisement purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements. Information on warehouse withdrawals which account for approximately 6 percent of the total value of imports for consumption, while not subject to the verification procedure directly, should be improved indirectly (due to education of importers/brokers) by the verification of the warehouse entries to which they correspond.

VALUATION

The dollar value shown in the import statistics is defined generally as the market value in the foreign country, and therefore excludes U.S. import duties, freight charges from the foreign country to the United States, and insurance. Value information is required to be reported on import entries in accordance with Sections 402 and 402a of the Tariff Act of 1930, as amended.

COMMODITY INFORMATION

The basic import data are initially compiled in terms of the commodity classifications in Tariff Schedules of the United States Annotated (TSUSA). In this report the TSUSA data are presented in terms of a rearranged commodity classification system--Schedule A, Statistical Classification of Commodities Imported Into the United States, which is based on the Standard International Trade Classification, Revised (SITC).[2] Schedule A was constructed by the Bureau of the Census (1) to provide for the summarization of data for the approximately 10,000 TSUSA classifications into about 2,300 commodity groupings that are meaningful in terms of commodities important in the U.S. import trade and (2) to provide data in terms of the SITC outline that are comparable, insofar as comparison is possible, to the foreign trade statistics compiled by other trading nations.

At the 1-, 2-, and 3-digit levels, the numbering system of Schedule A is identical with that of the SITC. The commodity coverage is not always identical, but it is believed that for most statistical purposes the coverage at the 1-, 2-, and 3-digit levels can be considered essentially comparable with that of the SITC. Reasonable comparability for statistical purposes can also be expected, in most cases, when 5-digit Schedule A numbers are identical with SITC numbers. At the 4-digit level, the retention of an SITC number in Schedule A indicates similarity of coverage, but the degree of comparability may in some cases be somewhat less at the 4-digit level for identical numbers in the two systems than at the 5-digit level. When a non-SITC number is used as the fourth digit of a Schedule A number comparability of coverage with any given SITC classification at that level should not be expected, and there will be comparability only with combinations of SITC classifications.

[2]U.N. Statistical Papers, Series M, No. 34, 1961.

COUNTRY OF ORIGIN

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. In instances where it is known that the country of origin cannot be determined, the transactions are credited to the country of shipment.

Countries are presented in the order of Schedule C, Classification of Country Designations Used in Compiling the U.S. Foreign Trade Statistics. Country names that are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered to be a part of the country for statistical purposes. Schedule C is published as Annex B in Tariff Schedules of the United States Annotated. A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

The country designation UNKNOWN is used to reflect imports from countries which could not be identified because of illegible reporting on informal entries (shipments valued under $251). The designation OTH CTY represents the total for countries from which imports of the particular commodity averaged less than $1,000 per month based on cumulative general import figures for January-to-date.

ESTIMATED DATA FOR LOW-VALUED IMPORTS

The import statistics include estimated data for shipments valued under $251 reported on both formal and informal entries (informal entries generally contain items valued not more than $250), based on a 5-percent sample of such shipments during 1970. The estimates for shipments valued under $251 are shown under commodity codes 9900000, 990.0, 990, and 99 and are included in the section 9 total and the total for U.S. imports. They are excluded from the other 2-, 3-, 4- and 7-digit commodity

codes. (The estimates for low-valued shipments do not reflect any imports by mail of duty-free merchandise valued under $251, for which import entries are not required to be filed.)

The statistics for commodity codes from which the low-valued shipments are excluded are undercounted to the extent that such low-valued shipments of the particular commodity are made. The total value so excluded generally amounts to about 1 percent of the monthly import total. Although subject to considerable variability,[3] particularly when the estimated amounts are relatively small, these estimates for low-valued imports may be of some interest as a rough guide to the general magnitude of the effect that the exclusion of the items has on the commodity data for individual countries.

The extent to which the estimates shown under commodity code 9900000 might not agree with a complete tabulation of the shipments depends upon the number of items that fall in the sample. In table 2, which contains 7-digit commodity by country data, the number of items in the sample is shown by country under commodity code 9900000 in the net quantity columns. The number in sample can be used in conjunction with the table, shown in the column to the right, to obtain an approximate estimate of the sampling variability on a 2-times-out-of-3 basis.

The following will illustrate the use of the table:

Suppose an estimated value of $526,982 is based on 114 items in the sample. Referring to the line 100-124, one notes the values $32,500 and $35,700. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $494,482 ($526,982 reduced by $32,500) and $562,682 ($526,982 increased by $35,700).

Should a user desire to combine two or more figures that are estimated values or include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

If the number of items indicated from the sample is—	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between—	
	The specified estimate reduced by[1] --	And the specified estimate increased by --
0	0	2500

300-399	59100	64500
400-499	64800	70200
500-699[2]	71800	77100

[1]The actual value of shipments cannot be less than 1/20 of the estimated amount shown in the report. Figures in this column can be ignored in use of them for a particular total would bring the lower limit below 1/20 of the estimate.

[2]If the number of items in the sample is greater than 699, sampling variability for the estimates of the low-valued shipments will generally be less than 8 percent.

[3]The estimated total for low-valued imports reported under commodity number 9900000 is subject to a sampling variability of about 1 percent. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure that differed from the estimate by no more than 1 percent. The estimates by country under commodity number 9900000 are subject to greater sampling variability--around 10 percent for countries with about 300 low-valued shipments in the sample; around 20 percent for countries with about 100 shipments in the sample; and over 20 percent for smaller sample sizes.

REVISIONS TO IMPORT STATISTICS

Under the revision policy now in effect, it is planned that revisions to the monthly statistics for the current year will be published in the December issue of this report and these revisions will be reflected in the cumulative data in that issue. Revisions to statistics for the previous year are published in the current year's June issue. In instances where unusual circumstances require that an error be corrected prior to the regular time for carrying revisions into the statistics, an announcement regarding the revision is made. If errors are detected for which corrections are not published in this report, such corrections are held for reflection in the statistics to be published in Foreign Commerce and Navigation of the United States for the given year.

SOURCES OF FURTHER INFORMATION ABOUT FOREIGN TRADE STATISTICS

Summary statistics for both exports and imports are published in Report FT 900, Export and Import Merchandise Trade, and Report FT 990, Highlights of U.S. Export and Import Trade. Information regarding the foreign trade statistics program is furnished in the Guide to Foreign Trade Statistics for the current year. The Guide contains an explanation of the coverage of the statistics and provides sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports and tabulations.

A discussion of the compilation procedures and coverage of the statistics also appears in the foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Supplementary information and explanations of interest to users of foreign trade statistics (such as notices of changes in types of shipments covered by current statistics, unusual shipments, problems of valuation and classification, changes in statistical procedures, etc.) are included as special announcements in current issues of the statistical publications. Reports providing additional detail compiled but not published may be obtained on a cost basis.

Copies of foreign trade reports and tabulations are available for public reference use at the reference locations listed below, at various other Department of Commerce field offices, and at some Bureau of Customs offices. Since the distribution of foreign trade material varies among offices, inquiries regarding the availability of particular types of data should be made at individual offices or directed to the Bureau of the Census, Washington, D.C. 20233.

Some of the principal reference locations for foreign trade statistics are:

Table 2. Schedule A Commodity by Country of Origin

(For coverage, valuation, and sampling procedures, see General Explanation. Shipments valued at less than $251 are shown only under Schedule A commodity 990.0000 and excluded from all other commodities. **OTH CTY** represents total for countries averaging under $1,000 per month based on general imports)

Country of origin	General imports				Imports for consumption			
	Current month		Cumulative, January to date		Current month		Cumulative, January to date	
	Net quantity	Value (dollars)	Net quantity	Value (dollars)	Net quantity	Value (dollars)	Net quantity	Value (dollars)

Table 2. Schedule A Commodity by Country of Origin

For explanation of symbols, see General Explanations. Imports valued at less than $251 are shown only under Schedule A commodity 100.0000 and excluded from all other commodities.
OTH CTY represents trade for countries ranking under $1,000 per month except for general imports.

Country of origin	General imports				Imports for consumption

Table 2. Schedule A Commodity by Country of Origin

(For coverage, valuation, and sampling procedures, see General Explanation. Shipments valued at less than $251 are shown only under Schedule A commodity 9310000 and excluded from all other commodities. OTH CTY represents total for countries averaging under $1,000 per month (based on general imports))

Country of origin	General imports: Current month, Net quantity	General imports: Current month, Value (dollars)	General imports: Cumulative, January to date, Net quantity	General imports: Cumulative, January to date, Value (dollars)	Imports for consumption: Current month, Net quantity	Imports for consumption: Current month, Value (dollars)	Imports for consumption: Cumulative, January to date, Net quantity	Imports for consumption: Cumulative, January to date, Value (dollars)
